

*Associate Professor/Dr. Inesh Kenzhina*

Satbayev University, Almaty, Kazakhstan

Inesh Kenzhina is a Leading Researcher for fusion and fission materials at Satbayev University and the Institute of Nuclear Physics. She is working on structural and functional materials for fusion and fission, mostly being focused on in-situ irradiation of materials at the fission neutron research reactor. One of the recent projects, is the irradiation of optical fibers for ITER at the research reactor WWR-K, and studying of their properties. She is a program manager for fusion blankets program.
